Introduction

Thank you for being a Road Ready Customer and welcome to the family.

We do one thing and do it well – build products that make your life easier. Crafting innovative, quality products is our calling and we take it seriously. Strong, lightweight and versatile, your IntelliStage system is crafted out of the finest materials available and put through our grueling quality check before it ships out the door.

We thank you for your purchase and know that your IntelliStage system will definitely steal the show! However, if you should require any assistance or service, you'll find that we take as much pride in supporting our products as we do in designing and building them.

About Intellistage

Perfect for schools, Houses of Worship, hotels and event organizers, IntelliStage Portable Stage Systems are the ultimate in portablilty and convenience. Consisting of modular, lightweight platforms and risers that can be combined to create customized stages in various heights and configurations. Easily assembled by a single person, each platform and riser are fastened together using our unique internal locking system and each platform can bear weight up to 157 lbs./sq. Ft (757 KGS/sq. Meter) When it's time to break down, you'll find that disassembly and storage are equally convenient. IntelliStage systems are available in kits designed specifically for various applications. See our catalog or website www.IntelliStage.com for details.
Optional upgrade accessories like flight cases, caster boards, guard rails, chairstops and skirts are also available. Go on, feel free to take the stage.

Limited 2 Year Warranty

Sizes & Configurations (European)

Platforms

Rectangle and Square Platforms

ISPE2X1CS	2m x 1m Carpet Finish Platform (single pack)
ISPE2X1CD	2m x 1m Carpet Finish Platforms (2 pcs per master pack)
ISPE2X1TS	2m x 1m Tuffcoat Finish Platform (single pack)
ISPE2X1TD	2m x 1m Tuffcoat Finish Platforms (2 pcs per master pack)
ISPE2X1IS	2m x 1m Industrial Finish Platform (single pack)
ISPE2X1ID	2m x 1m Industrial Finish Platforms (2 pcs per master pack)
ISPE1X1CS	1m x 1m Carpet Finish Platform (single pack)

Guard Rails

ISE1X1GRPD	Guard Rail for 2X1 and 1X1 platforms (2 pcs per master pack)
ISESTEPGRPD	Guard Rail for step platforms (2 pcs per master pack)

Guard Rail Hardware

IS2CMB	2 pack of Guard Rail Corner Mounting Brackets
IS2SMB	2 pack of Guard Rail Side Mounting Brackets
IS10MS	10 pack of Guard Rail to platform Mounting Screws

Chair Stops

ISECSTOP	1m Descending Chair Stop - For use between platforms.
ISECSTOP5	1m Ascending Chair Stop - For use on top platforms.

Transportation Systems

ISEC6X2X1C	Flight Case for 6 pcs. of 2m x 1m platforms with matching risers & front access door
ISEC6X1X1C	Flight Case for 6 pcs. of 1m x 1m platforms with matching risers
ISE2CB	Caster Board for 20 pcs. of 2m x 1m platforms
ISE1CB	Caster Board for 36 pcs. of 1m x 1m platforms
ISE2X1AC	Accessory Case for 10 risers and skirts
ISE1X1AC	Accessory Case for 18 risers and skirts

Features:

Platforms:

- Lightweight and compact for easy setup, transport and storage
- Durable grey carpet, Tuffcoat and Industrial finish
- Multiple layer platform construction featuring honeycomb structure with a weight capacity of up to 157 lbs./sq. Ft (757 KGS/sq. Meter)
- Convenient cable and electrical ports on select platforms
- Integrated platform interlocking system
- Metal reinforced corners and aluminum profile edges

Risers:

- Universal, collapsible lightweight risers available in standard height configurations.

Specifications:

Platforms:

Finish:	• Grey carpet • Tuffcoat • Industrial

Materials:	• Multiple layer sandwich construction
	   • Top: 22/64" (9 mm) high density plywood
	   • Middle: 19/32" (15 mm) honeycomb
	   • Bottom: 9/64" (4 mm) high-density plywood
	• Aluminum profile on all sides with integrated platform interlocking system

Sizes:	See page 16 (U.S.) and 18 (European)

Risers:

Finish:	• Brushed aluminum
Materials:	• Aluminum • Copper • ABS Plastic
Dimensions (height):	See page 16 (U.S.) and 18 (European)

Weight Capacity: 157 lbs./sq. Ft (757 KGS/sq. Meter)

Recommended platform storage position

Storage:

When storing your stage system, be sure to heed the arrows on the bottom of the platforms. This is to ensure that the panel interlocking devices are not damaged.
## Important Safety Instructions:

1.) Read and follow all instructions
2.) Do not exceed the maximum weight capacity
3.) Do not vertically couple more than 2 risers
4.) Completely secure all fasteners
5.) Assemble and use only on a flat and level surface

Meet the Components:

Putting together your IntelliStage system was designed to be simple enough for anyone to do. Consequently, the number of components you will encounter in the assembly process is limited. Nonetheless, let's take a moment for a little meet and greet...

A.) Platform

B.) Riser

(ISSJ)
C.) Riser Clamp

D.) Chair Stops

E.) Guard Rail and Hardware

F.) Hex Key

A.) Platform
Durable, modular stage surface - supports up to 185 lbs./sq. ft. (900kg/sq. meter).

B.) Riser
Supports platform surface - available in 8", 16", 24" and 32" (20, 30, 40 & 60 cm.) heights.

C.) Riser Clamp (ISSJ)
Provides support in situations where you would like to secure risers of different heights. Device is also used to secure steps to each other, as well as to platform risers.
D.) Chair Stops
Chair stops prevent chair legs from slipping off the top of a stage or between platforms of different heights.

E.) Guard Rail and Hardware
Guard rails are an optional add on to any stage or step system that provides an additional measure of safety for performers. Corner bracket hardware (IS2CMB) is sold separately.

F.) Hex Key
Probably the only tool other than a screwdriver you'll need to put your stage system together.

Accessories

ISSJ	4 pack of Connecting Hardware for various heights of stages & steps
ISREK	4 pack of Riser Extension hardware

ISSK4X32   4' wide, 32" long Black Skirt

Assembly 101:
## Securing Platforms 2 Risers

Getting your stage system up and running has never been easier than this. You are literally minutes away from having a sturdy, professional presentation platform.

• Unpack your platform and risers.

• Expand riser completely

• Properly align platform and place onto riser. Verify that all riser to platform connection points and corner locking mechanisms are properly aligned in their platform hole.

• Lock platform to riser by turning the corner locking screws clockwise with the included hex key until tightly secured.

• To assemble steps, follow the same proceedure.
Note: You'll find your hex key in the foam key holder in the groove next to the platform locking mechanism indicated by the arrow on the

What You'll Need:

Hex Key

① ② ③
Securing Platforms To Platforms

IntelliStage systems feature a unique, easy to use platform inter-locking system that ensures a safe, level performance surface.

1.) Expand risers completely and attach platforms as described in Assembly 101

2.) (A) Align platforms and make sure that the platform interlocking devices are in the closed position

3.) (B) Insert male locking mechanism into groove on opposite platform. (C) Rotate locking screw clockwise. Repeat until your stage system is complete.

A Close-Up Look:

A.) Align Platforms

B.) Insert male locking mechanism

C.) Rotate locking screw clockwise

Ascending Chair Stop

Descending Chair Stop
Chair Stop Installation

To install chair stops completely set up your stage before beginning the next steps.

• First familiarize yourself with your chair stop. There are two types of chair stops: Ascending (for use on top platforms) and Descending (for use between platforms).

• Orientate your chair stop "right side up" (hex screw should be on top) and align with your platform or step.

• Using a hex key secure the chair stop to the platform by turning the locking mechanism clockwise until tight.

Note: You may have to remove platform to platform locking mechanisms to complete your configuration. Locking mechanisms unscrew and slide out of platforms
Typical Stage Configurations

With your IntelliStage system, the configuration possibiliies are endless – your boundries are only safety limitations and your imagination. In addition to these typical stage setups, you can create nearly any shape you can think of, including multiple levels and more!

A Close-Up Look:

A.) Align Chair Stop With Platform

B.) Insert male locking mechanism

C.) Rotate locking screw clockwise

Standard Configuration

"Y" Configuration

Runway Configuration

Round Configuration

Guard Rail Assembly 101

Completely set up your stage with drilled guard rail platforms before beginning the next steps.

1.) Align guard rail with holes and slide rail onto platform.

2.) Secure guard rail with bolt and large hex key as shown.

Secure all guard rails to platforms before proceeding.

3.) Couple side guard rails together with IS2SMB (included w/rail packages) hardware and a small hex key.

4.) Where applicable couple corner guard rails together with IS2CMB hardware (sold separately) and a small hex key.

To assemble steps, follow the same proceedure.

Note: Do not use guard rails on folding platforms.

②

③

IS2SMB

④

IS2CMB

What You'll Need:

Large and Small Hex Key
## Securing Steps or Risers of Different Heights (ISSJ)

When designing a custom stage configuration, you may encounter situations where you would like to use risers of different heights. Because the platform inter-locking mechanism will not work in this scenario, we've designed an alternate method that provides the same level of security. This is the same proceedure that you would use when securing steps both to each other and to the stage risers.

1.) Expand and align risers. Mount stage platforms as described in Assembly 101.

2.) If necessary, loosen clamp by turning knob counter-clockwise. Insert clamp between riser and rotate entire clamp in either direction until aligned properly (see figure 3).

3.) Secure riser clamps – by turning knob clockwise.

4.) To secure a single platform or step use a minimum of one package ISSJ hardware (4pk). Use 2 ISSJs per platform corner (see figures 1 and 3) and secure a minimum of 2 of the platforms adjoining corners.

What You'll Need:

Riser Clamp

UP
Prepping for Guard Rails

IntelliStage platforms and steps must be drilled to accomodate guard rails. Newer platforms have marked guide holes indicating where to drill. Older platforms must be marked using a template before drilling can occur. Templates are located on pages 10-13.

- If your platform does not have marked guide holes as indicated by the black arrows in the above illustration, use the appropriate template (pgs 10-13) and mark the drilling locations as needed.

- Drill through the platform with a 7/16" or 11mm drill bit. Make sure to keep the drill perpendicular to the platform while drilling.

Note: Only drill the required holes for your platform configuration. Do not use guard rails on folding platforms.
