- For use mostly indoors and should be installed on a flat surface.
- 10 Year warranty
- Available in 2 surface finishes

**Weight rated at: 750 KG / SQ M (153 LBS /SQ FT).**

### No-trip, Seamless Surface Design

Our platform surface has a seamless, smooth, no-trip design with dancers and performers in mind. Theirs has a metal perimeter that can lead to tripping during performances.

### Removable Connection Hardware

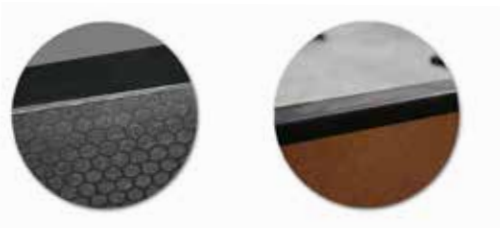

Our platform 2 platform connection hardware is removable and creates a uniform exterior perimeter if removed. Our competitor's connection hardware is fixed, cannot be removed and can cause damage or injury during transportation.

All Platform 2 Platform Connection Hardware is included with each one of our Staging 101 platforms. Platforms include Connection Hardware for creating both level stages as well as tiered choral risers and stepped stages.

### Continuous Tubular Frame Construction

Our panels feature a strong continuous tubular frame construction that produces a seamless support structure. Our competitor's panels use a weaker C-channel stamped frame that includes multiple breaks and seams that can weaken the support structure.

### Easy to Handle Frames

Our frame is sturdier and more comfortable to pick up & install. Our panels provide 1.5 inches of hand support while our competitors only offer .5 inches.

### Stairs, Ramps, Backdrops, Guardrails, Skirts & Accessories are all available!

Choose from adjustable or fixed stairs

Stage back drops and back drop curtains

4 panel stage shown with guardrails, stairs and skirting. combine panels as needed to form the size you need!

Guardrails are available

Descending & ascending chair stops

Equipment and wheel chair ramps are available in several configurations
